

Expert Choice Partner Network

For 25 years Expert Choice software has assisted with complex decisions; to allocate investment portfolios, to determine strategic priorities, to reach consensus in tough human resource matters, and to evaluate vendors.

Consultants and government advisers are among our most active customers. Our broad partner program is designed to meet the needs of both individual consultants and larger consulting organizations.

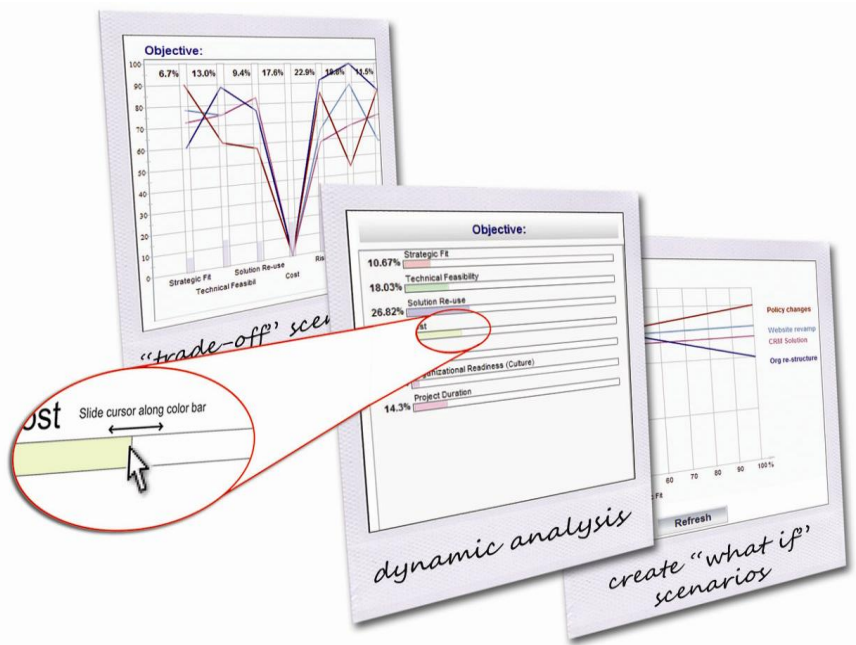

The recently announced **Silver Partner** program gives all partners access to our web-based software.

Silver Partner Program

- No up-front investment
- Flat fee per decision
- Self-guided web-based learning program
- Networking opportunities with other consultants

Expert Choice also offers our EC Inside product capabilities for subject matter experts with existing data. We partner your data with our web based engine and plug it into your website design, to create a targeted, purpose specific product offering.
